

## **Friulparchet**

### **Pre-finished solid wood parquet**

The timeless elegance of solid wood and the essence of Slavonian European Oak make the perfect combination of eternal appeal and refined elegance.

The result is Tabula Quercus: a floor in 15 mm thickness and various formats suited to every

interior. Tabula Quercus is delivered with its surface already finished with oil or varnished in various tints and variants ready for installation and use. In addition to the many colors in the catalog, there is no shade that the Friulparchet laboratories cannot create on request. The working techniques developed also allow Tabula Quercus to be applied as wall facing or provided with herringbone cut. [www.friulparchet.eu](http://www.friulparchet.eu)
